

Mobile reclining chairs

All Primacare chair styles can be supplied as mobile products with different diameter wheels to accommodate differing seat heights.

Brecon mobile

mobile, hoist friendly, rise and recline chair including a drop down footboard as standard

- Optional dual and dual tilt-in-space actions
- Optional full battery back up with freedom pack - no wires and up to 80 cycles
- Various foam/gel seating options, available in any fabric
- Mobile option available on other primacare models, contact us for details

Note: There is a decrease in manoeuvrability with heavier clients - recommended maximum client weight of 15 stone.

Sturdy grab handle.

4 large castors, 2 rear castors lockable.

Footrest extended

feet raised

full recline

Normal sitting with feet supported

Model shown: Tintern style in Navy Blue Cadet vinyl

Sturdy grab handle.

Note: There is a decrease in manoeuvrability with heavier clients - recommended maximum client weight of 15 stone.

4 large castors, 2 rear castors lockable.

Optional lateral support back

Drop down footboard as standard

High rise position

Chair reclined showing high leg lift

Model shown in waterproof green velour fabric

Tintern Porter

Mobile manual reclining chair including slide out footboard as standard.

- Manual recliner action is Tilt - in - Space
- Various foam/visco/gel/air seating options
- All chairs available in any fabric

Bariatric

Denbigh style 40 stone chair, 30" wide with a removable arm. The chair shown is in Boltflex quattro sky main fabric with a special Vyflex sky colour stretch vinyl seat over a prima gel pressure reducing seat interior.

Warwick high back chair Available with a choice of three seat heights and two back heights in any of over 100 fabrics in the primacare range

Drop arm

All chairs can be supplied with a Drop Arm which is locked in the upper position and released by a lever. The Arm drops below the seat height for ease of side transfer.

Accessories

Standard chairs are supplied with simple push button controllers and 24 volt transformers with emergency recovery. Optional extras include full battery back up, hazard sensors (anti-entrapment) and massage and heat pad systems

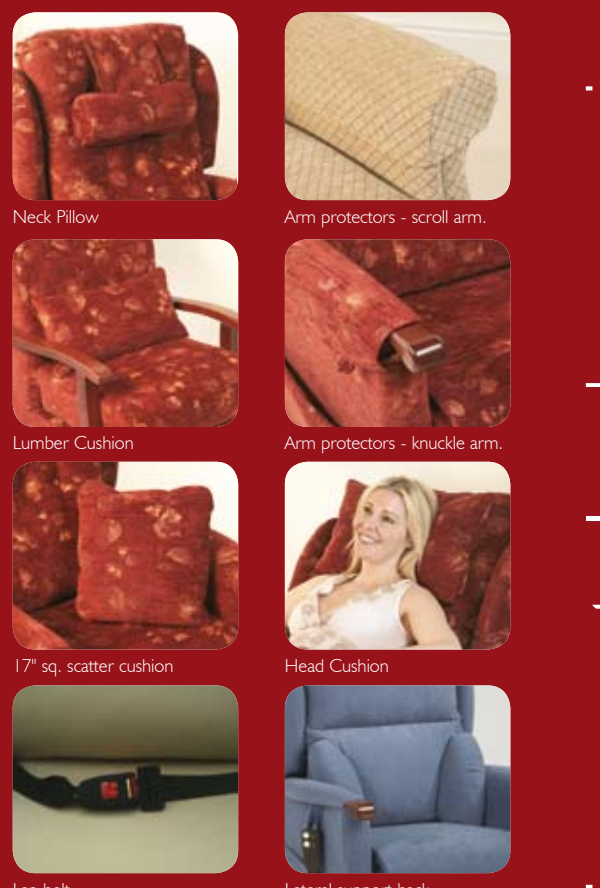

Full Battery Back-Up unit enabling the chair to be operated up to 80 cycles before recharging

All primacare chairs can be specified with a full hazard sensor strip around the bottom of the chair. When a hazard is encountered the motor stops immediately and reverses a short distance.

primacare offer a wide range of accessories available in all fabrics. Below are shown our range of soft fibre filled accessories which can be produced in fabrics to complement or contrast your chosen chair.

Electric rise and recline actions

all primacare chairs can be specified with one of the five recliner actions shown

Single motor Tilt-In-Space

A quiet smooth recline action with a zero gravity no shear motion. The powerful 6kn motor lifts with a 'tilt in space' motion. This action has three manually adjusted pivot positions allowing the chair to rise as shown or to a near horizontal rise position.

Single motor Wall-hugger

The action reclines smoothly with its single motor moving the chair seat forward as the back reclines. This enables the chair to be placed within 3" (75mm) of a wall and recline perfectly. The powerful 6kn motor lifts to a full height exit position.

Single motor 3-Way action

A conventional recliner action where the angle between back and seat increases as the chair reclines.

Dual motor standard action

A conventional recliner action where the angle between back and seat increases as the chair reclines.

Max weight 20 stone (127 kg). 2 year warranty on action & motor

Dual motor Tilt-In-Space

This action allows for individual adjustment of the back angle position, but allows the recline motion to operate in a tilt-in-space motion with no change to the seat/back angle during the recline movement. This ensures a comfortable no-shear feeling.

4 motor action

This action allows the operator to operate each of the 4 motors separately. The 4 operations are legrest, back, tilt and vertical rise.

Fabrics

Range A: The 'Diamond' fabric range is a General Domestic quality fabric available in four colours (beige, green, blue and red) on all models and also NextDay on the Aberdare and Brecon standard size chairs.

Range B: Choice of 80+ General Domestic fabrics available to order in approximately three weeks.

Range C: Severe Contract hard wearing fabrics and waterproof anti-microbial anti-MRSA fabrics to CRIB5 fire retardant standards.

Specialist: primacare can offer any chair in upgraded fabric from ranges and manufacturers such as, Panaz, Boltaflex, CTR Microcare, Panvelle Stretch and Vyflex.

Leather: All primacare chairs can be made in soft leather in a wide choice of colours.

Foams and fillings

All standard primacare models use high resilient seat foams for comfort and long life. Chairs can be specified with different foam densities for softer seating where required. We also offer three optional extra seating types.

Visco - The combination of high density, high resilient foam base and visco elastic heat sensitive foam surface is idea for pressure reducing cushions.

PrimaGel* - This cushion uses combustion modified high resilient foam with a profiled upper surface to increase pressure distribution, encasing a silicon gel sac, which dissipates pressure in high areas of loading.

PrimaGel+* - This cushion combines combustion modified high resilient foam with visco elastic heat sensitive foam and silicon gel to provide unrivalled pressure distribution.

Seat cut out - all chairs can be supplied with a seat cut out to enable the use of special seat cushion inserts, for example an air cushion. Fabric covered foam insert supplied with all chair seat cut outs.

Coolgel - This is a Proprietary Silicone Polymer designed to have the same physical characteristics as human fat tissue. The softness stays unchanged at any temperature. The polymer is a solid and will not flow or leak if punctured. It is Hypoallergenic - it does not contain latex or isocyanates. It is odourless and the cellular design allows air to circulate between the cells to minimize heat and moisture build up. An even pressure distribution contours to the underlying surface.

*Trade name of STM Healthcare - Division of Rectel Ltd.

Air Cushion

Dynamic pressure relief seat cushion and pump.

- 6 cell dynamic cushion.
- 9 min 36 second, 2 cell cycle
- maximum weight 19 stone, 121 kgs.

electric rise and recline chairs

actions, control and accessories

Denbigh

Solid wood arm knuckles with a three tier waterfall back, full chaise footrest and padded wings complete this design.

Denbigh dual motor standard chair in Richmond Jade fabric (range B)
